DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 13 and 14, drawn to color correction, classified in class 358 subclasses 518 and 3.26 as well as class 382 subclasses 162 and 254.
 - II. Claims 7-12, drawn to color conversion, classified in class 358, subclass 522 and 525.

The inventions are distinct, each from the other because of the following reasons: Group I claims discloses averaging the color component values and comparing it with a reference value.

Wherein group II claims utilize generation of histogram for each color component and averaging the histogram value and creating a new image by converting the histogram so that an average value of a histogram resulting from the conversion matches a specified reference value.

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I claims do not need the histogram generation in order to match the average value of color components with a specified reference value.

Art Unit: 2622

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to applicant's attorney, Yong Choi, on March 17, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
